

MAXIMIZE
YOUR SPACE

MOVE HOME

WHAT IS MOVE HOME?

Move Home is a mobile platform equipped with a rail-mounted module that allows you to configure small residential or commercial spaces to maximize their potential, according to your needs at different times of the day. With its smart touchscreen, adding a whole new dimension to your space is child's play. It's simple, easy to use, and safe.

MOVE HOME

HOW DOES IT WORK?

Move Home is the perfect solution for maximizing open-concept loft and studio spaces measuring 350 to 450 sq. ft. (35 to 45 m²). The remarkable versatility of Move Home modules allows plenty of flexibility to play with your space. Make the kitchen and living area 10 ft. (3 m) longer by moving the module closer to the bedroom, or vice versa. In an area 16 ft. (4.9 m) wide by 25 ft. (7.6 m) long, for example, a reconfigured bedroom can be up to 15 ft. x 16 ft. (4.6 m x 4.9 m) or the living area 16 ft. x 16 ft. (4.9 m x 4.9 m). Not only does Move Home offer simplified project management, it is also an eco-friendly, sustainable option. Plus it all costs less than traditional renovations!

READY TO MOVE IN

The module features a full kitchen and a bathroom with toilet, sink, and shower, as well as an entry closet, a wall bed, a laundry cupboard that can accommodate a stackable washer and dryer, and, behind the sliding module, a large wall of built-in storage cupboards. Our units are factory built, then delivered and installed onsite in only a few days by a team of certified experts.

MOVE HOME

WHO WE ARE

Move Home Inc. is a Quebec-based manufacturer offering innovative and flexible solutions to maximize the potential of small residential and commercial spaces. Our plant is equipped with state-of-the-art technology that guarantees short lead times and superior products, at competitive prices.
